Eric-

I reviewed the table/figures and only changed one semantic item (not location- just labeling): split 3 samples out from 9C so 1 is in 9C and 2 are in 9B. I made this change in the table.

1. I inserted a table (Table 2) into the Excel Workbook as a separate worksheet (Station_Locations) which contains coordinates for the proposed subsurface sediment locations- attached as SedimentCoreSamples080907.xls
2. I've also included a table for the supplementary surface sediment samples depicted on these figures: surfsed_proposed_080207.xls
3. Will post figures for transmittal to EPA on our Public FTP site unless Mary or Rob have any comments: <ftp://ftp.orr.noaa.gov/public/ARD/PortlandHarbor/Exports/>
4. Lastly, will follow up with transmittal of spatial data to Gene Revelas & Jessica Pissano (sp?) as discussed.f

Please let me know if there are any errors/corrections-

Thanks!
Ben
